-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 March 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION***Election/Restrictions***

Applicant's election of the absorbent garment in the reply filed on March 28, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1-9 and 19-26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention and species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on March 28, 2005.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tuman et al. (US 2001/0018110) in view of Nestegard (US 4894060).

Tuman et al. (figures 1, 2, 5, 6) teaches that it is desirable to have a fastener usable on clothing that is breathable wherein the final product can have its porosity, elasticity, flexibility, breathability and stiffness affected by the web and therefore adjustment of these variable by adjusting the web properties is desirable [0021] – [0024]. The difference is that the thickness is not specified as being between 50 to 200 microns. It would have been obvious to utilize a thickness in the range of 50 to 200 microns in view of Nestegard (figures 1, 6-9) teaching that it

is desirable to utilize a thickness in the range of 50 to 400 microns and preferably 150 microns so as to be properly attachable (col. 3, line 61 – col. 4, line 5). As to claims 11-18, these ranges are obvious over the combined teachings of Tuman et al. and Nestegard as they teach that the level of skill in the art is such that stiffness, backing thickness and hook density were variables to be changed to effect the operation of the fastener and there is no new effect by changing the variables in the manner sought by applicant.
